

2nd Iberian Meeting Provisional Program

Friday, 13th September

08:45 – Welcome and Opening of the Meeting

09:00 – 10:30 - How to... in Heart Failure and Myocardial diseases

- How to apply global longitudinal strain in the clinical practice
- How to image the athlete's heart with CMR
- How to diagnose myocarditis with CMR: a contemporary approach
- How to guide management of patients with myocardial disease using nuclear imaging

10:30 – 11:15 – Is CCTA still necessary in the emergency department in the era of high sensitivity troponin?

Pro

Con

11:15 – 11:45 – Coffee-break

11:45 – 13:15 Multimodality imaging in valvular heart disease

- CT imaging for failing prostheses OR CMR for functional mitral regurgitation
- Role of CT in transcatheter aortic interventions – what's new in new guidelines
- Role of PET in the evaluation of surgical valve dysfunction
- New tools for assessing valvular heart disease using CMR: 4D-Flow
-

13:15 – 13:45 - Conference:

Role of CMR imaging in risk stratification for sudden cardiac death

13:45 – 14:45 - Lunch break

14:45 – 15:15 - Conference:

Functional assessment of coronary artery disease by CT: ready for prime time?

Bjarne Noorgard

15:15 – 16:45 – Hot topics in Cardiovascular Imaging:

- Artificial Intelligence in cardiac imaging: here to help, here to steal our jobs or should my grandchildren worry about
- SCOT-Heart and PROMISE: truth, lies or where the truth lies -
- Calcium Score to guide statin therapy: are we ready to deliver in Portugal and Spain?
- Gadolinium deposition and chronic toxicity

16:45 – 17:15 – Coffee-break

17:15 – 18:00 - Stress perfusion imaging should be an essential part of any CMR protocol for assessment of DCM

Pro -

Con

Saturday, 14th September

08:30 -09:45 – The best-case report contest (10 cases, 5 Portugal, 5 Spain)

09:45 – 10:30 – Imaging atheroma is more important than imaging ischemia

Pro

Con

10:30 – 11:00 – Coffee-break

11:00-12:30 - Congenital Heart Disease Assessment with cardiovascular CT and MR:

- CT protocols for pediatric CHD: acquisition basics
- Congenital coronary artery anomalies: assessment and clinical management –
- CMR imaging in post-operative congenital heart disease patients: predicting outcomes and guiding clinical decisions
- Bicuspid aortic valve disease -

12:30-13:00 – Conference: Opportunities for clinical research in the big data era: perspectives for cardiovascular magnetic resonance

Steffen Petersen

13:00-14:00 - CCC: Portugal vs Spain – 12 cases

Each team: 1 coach chooses 5 trainees from all over the country

Spain team

Portugal team

14:00 – The best-case award

Closing remarks
